Application for Double Major

This option is available only to students in bachelor's degree programs (either 4- or 5-year). In order to graduate from Thomas College with a double major, a student must complete all course requirements of both majors. Students may be required to complete more than the 120 credit hours normally required for a bachelor's degree. Core courses would apply to both majors. Where a specific course is required in one major and a professional elective, liberal arts elective, or a general elective is required in the other major, the course will apply to both majors. The student receives one diploma, but both majors are indicated on the student's transcript.

Name:_____
