Assistant Professor of Science

TESSA HARDEN, PH.D.
Assistant Professor of Science

STEVEN KAHL, PH.D.
Professor of Science

RYAN WHEATON, PH.D.
Associate Professor of Management

Why Global Sustainability at Thomas College?

A growing field, global sustainability is a multi-disciplinary degree program encompassing multiple disciplines offered at Thomas: science, social studies, humanities, education, economics, and business.

This program is especially timely today because of the supply-chain issues creating shortages of products ranging from lithium to helium, oil to wheat, and even including climate-related resources such as water and energy. The time is now for careers and personal understanding of global sustainability. Students in this program will explore social and management principles through the lens of the triple bottom line (People, Planet, Profits) thinking in their careers and personal lives, while also broadening their exposure to global issues and cultures, including environmental justice and social justice. This field of global sustainability is growing and jobs are too; the Bureau of Labor Statistics projects that sustainability jobs will increase 16% annually for the next decade.
