

Accounting at Thomas College

[Music]

So, it's a great time in the accounting profession at Thomas College and throughout the country. The opportunities are endless in accounting right now, so the profession as a whole is treating our students very good. We have a lot of students that get placed all across the country. We have a 100% placement rate at Thomas. That's something that we're very proud of.

Every one of our students leaves here with a job if they graduate in the accounting program. If you want to be a CPA you need 150 hours of schooling so, essentially in the old in the old days, that would have been 5 years of school.

We recognize that students want to get out there and make money sooner, so we came up with a 3+1 program. You get your undergraduate degree in three years and then you come back for your grad program in one year, so you end up getting what used to be 5 years of school. You get it done in four years and for the price of four years.

If students do stay here for the grad program, we offer a course on forensics or fraud examination and we as a school, Thomas College, will cover the cost of you to sit for the certified fraud examiner license. We'll buy the study materials. We'll have you sit for it. We'll cover all of that cost. We do it through our Fire and Ice program, but our students have found that - we found that - to be very beneficial.

We've had several students leave Thomas College as certified fraud examiners already, something that usually isn't attained for 2 or 3 years after you graduate.
