

Life as an Accounting Student

[Music]

I applied to a few different jobs, but the first one that I got was at MDD Forensic Accountants, which was pretty much my dream job. So, I went ahead and just went with them and I've been there ever since.

My favorite part about my academic program at Thomas was in the forensics concentration because it exposed me to criminal law, it exposed me to evidence, it exposed me to cyber security. It was all these different aspects of financial investigations that I wouldn't have gotten elsewhere at a different program for just accounting. So, it really helped, kind of it was a well-rounded program, really helped me in the real world.

There're not many colleges that offer forensic accounting as a program or concentration so when I went to go apply for my job it was a huge surprise to them that any college offered forensic. So, it was a huge leg up on other applicants for the job and there was supposed to be a second interview. They just went ahead and hired me. So, it was great to have that background in forensics and that really helped kind of propel my career.
