

Kiest Morgan (3+1) Program

[Music]

The 3+ 1 program is a faster, smarter way to get both your bachelor's and your master's degree in 4 years. That's 2/3 quicker, 2/3 more cost effective, and you get a 50% increase on your competitive salary out of college. You'd be silly not to do it.

Thomas College is dedicated to getting you ready and into the workforce as soon as possible so you can get a quicker return on your investment. In order to do that, what we do is we accelerate the undergraduate degree where you're taking full loads of courses. You take some courses before the semester starts in the fall and after the semester ends in the spring. And so, within those three years you get the total number of credits you need to get that bachelors.

And our Master's programs are all accelerated as well. So, that's your three years as an undergrad and one year as a graduate student.
