

Why a Master's in Cybersecurity at Thomas College

[Music]

Thomas College has a unique master's degree in cybersecurity. It's focused on the big picture of cybersecurity. We take on students that can start any term. There are five terms in a year. And every year we provide the same courses, at the same time. We are able to adapt to your needs for learning because you can either take two at a time, or one at a time, or move it around. You can start any start time of those five terms.

Our objective is to let you climb the ladder to the top by having great value to the leadership and the executives of your organization. We start with the assumption that you know very little about cyber. We have two qualification areas where you need some prior knowledge. We'll help you get that for free or you can come in with that knowledge. We'll then add 10 courses and set you up for a career growth path that we can personalize for you by looking at all 45 different cyber jobs that have great opportunities for a future career and success.
