Business Administration at Thomas College

[Music]

So, our business administration and business management program here at Thomas is quite frankly our lifeblood of the school. Since the Inception of the college, we have actually had that program most of our graduates are basically either at senior level or executive level out in the business community. And that ranges from anything from Human Resources to finance to actually management project management.

So, the strength that we have here at Thomas College is bringing our graduate it's up through the ranks, if you will, and putting them into leadership positions pretty quickly after their career. Much of that actually happens in the academic classroom as it were. We're very focused in regard to having a student learn all of management theory but also practicum.

We also push, quite frankly, to a student their ability to get an internship and what we als. all externship, working alongside other leaders out in the community who are alumni to basically give them a taste of what it would be if they went and got that same very job upon graduation. It's quite easy for us to build that Affinity or Legacy in our business program CU most of our graduates are basically out there in the business Community willing and wanting to basically hire our graduates.

The importance of us being able to work with them directly so our students are being exposed to those effective professions and industries while they're still in school is really our differentiator. We're very good at that and we take careers very seriously here, because the thought is most of our students will basically be going into the workforce and they want to be going into the workforce at a higher level. And we have a track record of doing that consistently.
